

JSA-JSI Joint Symposium

JSA-JSI Joint Symposium

Room B 14:45 ~ 16:05, December 11

Chairpersons: Masato Kubo (Tokyo University of Science)
Kenji Matsumoto (National Research Institute for Child Health and Development)

JS1-1

14:45 ~ 15:05

Eosinophil and allergy: Development of biologics for asthma based on discovery of IL-5/IL-5 receptor

Kiyoshi Takatsu Toyama prefectural Institute for Pharmaceutical Research, Imizu city, Toyama, Japan

JS1-2

15:05 ~ 15:25

Establishment of a novel mouse model of atopic dermatitis (FADS mouse)

Kenji Izuhara Biochemistry, Biomolecular Sciences, Saga Medical School, Saga, Japan

JS1-3

15:25 ~ 15:45

IgE- and mast cell-dependent anaphylactic responses are regulated by the CD300-lipid axis

Jiro Kitaura Atopy (Allergy) Research Center, Juntendo University Graduate School of Medicine, Tokyo, Japan

JS1-4

15:45 ~ 16:05

Role of IL-13 in production of high-affinity IgE

Masato Kubo Research Institute for Biomedical Sciences, T, Department of Molecular Pathology, Tokyo University of Science, Noda, Japan
